## PROJECTS

Project name : Gluco QR .....

Project Description:

- This innovative product was showcased at the **India G20 MedTech Expo**, highlighting its significance in the field of medical technology.
- Implemented advanced features utilizing the **device's camera** for health screenings.
- Integrated APIs to facilitate effortless communication and generate real-time results.

Project name : Fanbuku .....

Project Description:

- Developed and launched FanBuku, a basketball fantasy game application, using the Flutter framework with Get for efficient state management.
- Implemented Get reactive programming to bring to life various game features like user authentication, game rules and prize redemption, ensuring sustained user engagement.
- Seamless integration of the PayPal payment system within FanBuku, allowing users to effortlessly purchase credits and access premium features.

## OPEN SOURCE CONTRIBUTIONS

❖ Resonate App (AOSSIL-Org) .....May 2024

- Resolved color inconsistency issues across the application in both dark and light themes.
- Implemented a **unified theme** for various components such as Email ID, Password fields, and logout icon, improving UI consistency.
- Adjusted the visibility of the "verify your email" text in verification emails to ensure legibility across themes.
- Collaborated with project maintainers to review and merge changes, ensuring code quality and conflict resolution.
- Contributed to the enhancement of the app's user experience by ensuring **dynamic color adaptation** for OTP fields and other interactive UI elements.

## CERTIFICATES

❖ Linux .....Feb 2024

Ace Infoedge

❖ Ethical Hacking from Scratch .....Apr 2020

Udemy
